

BLAIN VALVES FOR HYDRAULIC ELEVATORS

Excellence in Simplicity and Performance

Ref: 2021/KV handle

23.09.2021

Dear Customer,

Blain Hydraulics GmbH has recently modified the handle of ball valves. The new handle looks slightly different, however quality and working functionality remain the same. This change has created speculations about KV and EV valves having the new handle are being fake and not the original Blain valves. To prevent such misconceptions, pictures of the new handle are given below. The KV and EV valves, which have the handles shown in the pictures, are the original Blain valves. Customers can also get their valves registered from <https://register.blain.de> to make sure about the originality of their valves.

Yours sincerely

K. Ferhat Celik, PhD, MSc
